keep your bamboo beautiful

**Transparent,  
UV-protective technology**

## BONDEX BAMBOO CARE – NEW

Bamboo is one of the most important, natural substitutes for the endangered rainforest hardwoods, and is used for a large variety of purposes. The strength of bamboo, its straightness, smoothness and lightness – combined with hardness and hollowness – makes it possible to split bamboo into many different shapes e.g. sturdy furniture, handicrafts, fences etc.

### How can you keep your bamboo beautiful?

Bamboo is robust from nature, but it still makes good sense to apply protective coating to make extra sure that your bamboo is protected against the elements.

BONDEX Bamboo Care is the best care you can give your bamboo. The completely transparent, UV-protective technology prevents greying even from the strongest sun, without any change in the natural colour of the surface. The water repellent effect is increased many times by applying the product:

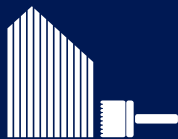

### **BONDEX Bamboo Care offers:**

- Extra UV-protection
- Prevents greying
- Surface protection against algae- & mould
- Water repellent
